Set Camera View Delay after trigger is off. Select from 0 - 10 Seconds delay for each camera input.

Monitor Stand Installation

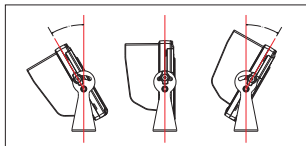

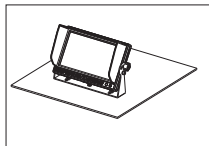

1: Remove the U-Bracket from the Monitor. Find a location that is desired for proper viewing. Before mounting the bracket insure the Monitor does not block any safety device or the drivers view.

2: Mount the U-Bracket securely using self tapping screws or nuts and bolts (not provided).

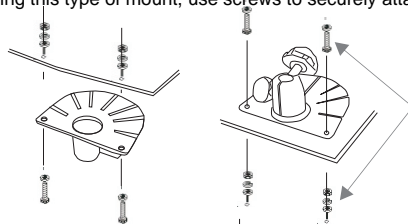

3: Re-attach the monitor to the bracket and adjust to a desired viewing angle. Tighten the thumb screws to insure the monitor is secure.

Monitor Installation - Optional Mount 250-8132 Not Included

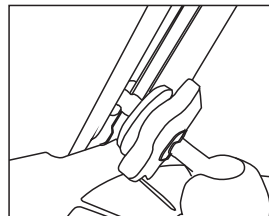

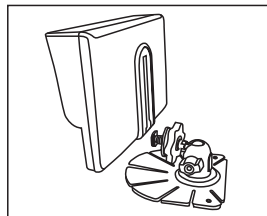

1: Find a location for the mount, Rostra does not recommend using mounts with double sided tape on 9" monitors. The Monitor may come loose and be a hazard or get damaged. If using this type of mount, use screws to securely attach the base.

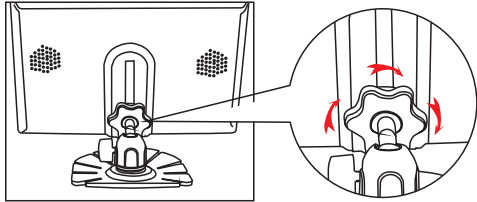

Self tapping Screws
or nuts and bolts are recommended

2: Slide the T-Bolt into the slot in the rear of the monitor. Do Not use the u-bracket when using a slid mount.

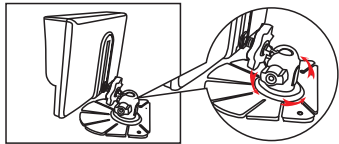

3: Adjust To the required level.

4: Turn the thumb screw clockwise to tighten into place at the desired height.

5: Adjust to the desired viewing angle and tighten the base thumb screw to secure.
