BY ROSTRA

Operating Your Comfort Heat™ seat heating system.

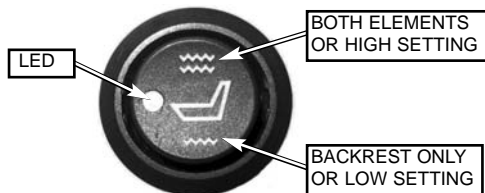

Your seat heater system provides therapeutic lumbar heat alone or both lumbar and seat cushion heat.

Optionally, It can provide heat on both surfaces at two temperatures.

Please note: This option will require that you (or your dealer) locate the controller box under the seat and clip the external blue wire. See section below or Dealer for details.

OPERATION PROCEDURES

BACK/BOTH OPERATION: (Factory Setting) Placing the switch in the 'LO' position, LED turns **RED**, warms the backrest alone. Placing the switch in the 'HI' position, LED turns **GREEN**, warms both the backrest and seat cushion. The controller module will regulate the seat temperatures until the switch setting is changed or until the vehicle ignition is turned off. Placing the switch in the center position turns the system off.

HI/LOW ACTIVATION: In order to activate this mode of operation, the external blue wire loop on the controller box below the seat must be cut away. Once cut, the system cannot be placed in the Back/Both Mode unless the wire loop is re-attached. See your Dealer if you have questions.
