

### Instructions

1. Using a pair of scissors, cut out the oval template above (**Note:** Additional copies of this template are available for download at [www.rostra.com](http://www.rostra.com)).
2. Align the oval template to the factory tailgate using the previous emblem's built-in stud locations as a point of reference (location A).
3. Once the studs are properly aligned, drill 3/8" (9mm) holes for the included anchors (location B).
4. Using a file, file the rounded holes into a square shape and press the anchors into place.
5. Using step bit, drill a 1 3/4" (44mm) hole to accommodate the body of the camera (location C).
6. Align the emblem/camera base to the tailgate and file the area directly below location C to accommodate the camera body and included wiring harness as needed.
7. Attach the emblem/camera base to the tailgate using the supplied screws (location B).

### Printing Suggestions

Paper Size: 8.5" X 11"

Paper Orientation: Landscape

Page Scaling: None
