**Recommended Tools**

### Personal & Vehicle Protection
- Safety Glasses

### Special Tools
- Volt-Ohm Meter

### Installation Tools
- Trim Removal Tool
- Phillips Screwdriver
- 10-MM Wrench
- Drill Bits 9.5MM or 3/8" (for switch)
- 14MM Wrench
- Soldering Tool

### Special Chemicals

**Conflicts**

**Legend**

- **STOP**: Damage to vehicle may occur. Do Not Proceed until process compliance has been met.
- **Operator Safety**: Use Caution to Avoid Risk of Injury.
- **Critical Process**: Proceed with Caution to Ensure a Quality Installation. These points will be audited on a completed vehicle installation.
- **General Process**: This highlights specific processes to ensure a Quality Installation. These points will be audited during the accessory installation.
- **Tools & Equipment**: This calls out the specific tools and equipment required for the process.
- **Revision Mark**: This mark highlights a change in installation with respect to previous issue.

**Warning:**

- Do not use hand-held 2-way transceivers inside your vehicle while driving.

When transmitting from inside the car, 2-way radios that operate in the 25MHz-700MHz frequency range with more than 2.0 watts of power can produce electromagnetic interference that could interfere with the operation of cruise and throttle controls resulting in vehicle "Limp Mode".

Use of cellular phones will not interfere with these controls.

Due to sensitive nature of signals used for this product, all non-plug and play connections must be soldered. Failure to comply with this requirement will void warranty.

Form #5535, Rev. A, 05-29-15
BEFORE INSTALLATION

To make the installation easier, the complete installation instructions should be read through before installation is started.

This installation instructions contains information how to install the Electronic Cruise Control which is not a Do-It-Yourself job.

Modern cars are equipped with electronics, which can be costly damaged by inappropriate treatment.

Rostra Precision Controls can not be held responsible for any error caused by wrong installation before installation.

ALWAYS DISCONNECT THE NEGATIVE CABLE FROM BATTERY BEFORE INSTALLATION.

ALWAYS USE THE ENCLOSED INSTALLATION INSTRUCTION FOR INSTALLING THE ELECTRONIC CRUISE CONTROL.

CHECK THE PART NUMBER OF THE CRUISE MODULE LABEL IS THE SAME COMPARED TO THE PART NUMBER OF THE INSTALLATION INSTRUCTIONS.

BE AWARE OF RADIO CODES THAT MIGHT HAVE TO BE TYPED IN.

FIND A LOCATION TO INSTALL THE CRUISE MODULE AND CONTROL SWITCH

IF ANY WIRES ARE LEFT, THEN CUT OFF AND INSULATE.

ONLY USE A MULTIMETER TO MEASURE VOLTAGE.

ALWAYS DRIVE THE CAR FOR A COMPLETE TEST BEFORE ASSEMBLING THE CAR.

ALL WIRE LEADS MUST BE SOLDERED.
**Electronically Cruise Control Kit**

**10mm Wrench**

**Negative Battery Cable**

**Battery**

**Fig. 1-1**

Connect to the accelerator pedal

**Note:** For vehicles with manual transmission only. Connect Clutch Harness to Control Module. Connect White Wire to Clutch Switch To Clutch (ground triggered)

**Clutch Switch**

**Green/Violet**
Focus: connect data harness to OBD2 connector. *Transit only: Cut the Rostra connector off and solder wires: Red Wire to Pin 6, Black Wire to Pin 14

Note: Use a precision tool to press up on the backside of the OBD2 connector housing to release the tab. Push out OBD2 connector toward the back to remove.

Connect Red wire to White/Blue wire in Pin 6 and Connect Black wire to White wire in Pin 14
To Ignition
Note: Test the ignition wire on the vehicle before connecting red wire from cruise system. Check for 12 volts with ignition key on and 0 volts with ignition key off.

**Ford Transit:**
Connect Red ignition wire to Brown/Yellow wire at the ignition switch connector located at left side of steering column.

**Ford Focus:**
Connect Red ignition wire to White/Blue or Blue/White wire at black connector at the right side of fuse box located under passenger side glove box.
1. Find a suitable position for the switch on the left hand side of the covering around the steering column.
2. Mark the position and drill a 3/8 hole.
3. Use the enclosed fittings so the switch is angled to match the OE turn signal switch lever.
4. The switch head can be rotated as desired, and locked with the supplied retainer clip.
5. Insert the wires in the dconnectors to plug into cruise module shown below.

NOTE: All Views From Wire Side Of Connector
Note: All accelerator pedal voltages shown are with the pedal fully depressed with ignition power.
