**Recommended Tools**

**Personal & Vehicle Protection**

- Safety Glasses

**SPECIAL TOOLS**

- Volt-Ohm Meter

**INSTALLATION TOOLS**

- Trim Removal Tool
- Phillips Screwdriver
- 10-mm Wrench
- Drill Bits 9.5mm or 3/8" (for switch)
- 14mm Wrench
- Soldering Tool

**SPECIAL CHEMICALS**

**Hardware Bag Contents**

**Conflicts**

**Note:**

**Legend**

- **STOP:** Damage to vehicle may occur. Do Not Proceed until process compliance has been met.
- **OPERATOR SAFETY:** Use Caution to Avoid Risk of Injury.
- **CRITICAL PROCESS:** Proceed with Caution to Ensure a Quality Installation. These points will be audited on a completed vehicle installation.
- **GENERAL PROCESS:** This highlights specific processes to ensure a quality installation. These points will be audited during the accessory installation.
- **TOOLS & EQUIPMENT:** This calls out the specific tools and equipment required for the process.
- **REVISION MARK:** This mark highlights a change in installation with respect to previous issue.

**WARNING:** Do not use hand-held 2-way transceivers inside your vehicle while driving.

When transmitting from inside the car, 2-way radios that operate in the 25MHz-700MHz frequency range with more than 2.0 watts of power can produce electromagnetic interference that could interfere with the operation of cruise and throttle controls resulting in vehicle “Limp Mode”.

Use of cellular phones will not interfere with these controls.

Due to sensitive nature of signals used for this product, all non-plug and play connections must be soldered. Failure to comply with this requirement will void warranty.
BEFORE INSTALLATION

To make the installation easier, the complete installation instructions should be read through before installation is started.

This installation instructions contains information how to install the Electronic Cruise Control which is not a Do-It-Yourself job.

Modern cars are equipped with electronics, which can be costly damaged by inappropriate treatment.

Rostra Precision Controls can not be held responsible for any error caused by wrong installation.

STOP-READ BEFORE INSTALLATION

IMPORTANT ADVISORY NOTES THAT YOU MUST FOLLOW

Always disconnect the negative cable from battery before installation.

Always use the enclosed installation instruction for installing the Electronic Cruise Control.

Check the part number of the cruise module label is the same compared to the part number of the installation instructions.

Be aware of radio codes that might have to be typed in.

Find a location to install the cruise module and control switch.

If any wires are left, then cut off and insulate.

Only use a multimeter to measure voltage.

Always drive the car for a complete test before assembling the car.

All wire leads must be soldered.
10mm Wrench

Connect to the accelerator pedal

Note: For vehicles with manual transmission only. Connect Clutch Harness to Control Module. Connect Yellow Wire to the top Clutch Switch connector to one of the 2 white wires.
Kia Rio: Connect the Red Ignition wire to pink wire in top left corner of white connector on the left side of the fuse box located under the drivers side dash.

Hyundai Accent: Connect the Red Ignition wire to pink wire in top left corner of white connector on the left side of the fuse box located under the drivers side dash.
1. Find a suitable position for the switch on the left hand side of the covering around the steering column.
2. Mark the position and drill a 3/8 hole.
3. Use the enclosed fittings so the switch is angled to match the OE turn signal switch lever.
4. The switch head can be rotated as desired, and locked with the supplied retainer clip.
5. Insert the wires in the connectors to plug into cruise module shown below.
**ELECTRONIC CRUISE CONTROL KIT**

**PIN COLOR DESIRED RESULTS  FAULT CONDITION**

13A RED +12V WHEN SWITCHED ON AND +OV WHEN SWITCHED OFF. IGNITION MUST BE GREATER THAN +10V WHILE CRANKING VEHICLE.  NO POWER, VOLTAGE DROP, OR INTERMITTENT CONNECTION WILL CAUSE LOSS OF PEDAL OR "LIMP MODE" CONDITION.

14A BLACK LOWEST RESISTANCE TO GROUND AND CLOSEST TO ZERO (0) OHMS AS POSSIBLE. USE A VEHICLE GROUND POINT WHERE OTHER GROUND WIRES ARE CONNECTED TO.  A BAD GROUND CONNECTION WILL CAUSE THE FOLLOWING CONDITIONS: CRUISE WILL NOT FUNCTION, LOSS OF PEDAL OR "LIMP MODE" CONDITION.

1B GREEN SET/COOD: 12V PRESS AND HOLD SET  CRUISE WILL NOT SET IF THIS CONNECTION IS NOT INSTALLED CORRECTLY.

2B YELLOW RESUME/ACCEL: 12V PRESS AND HOLD RESUME  CRUISE WILL NOT RESUME OR ACCEL IF THIS CONNECTION IS NOT INSTALLED CORRECTLY.

3B BROWN ON/OFF: 12V PRESS ON  CRUISE WILL NOT SET IF THIS CONNECTION IS NOT INSTALLED CORRECTLY.

6B RED AND BLUE 12V (0) OHMS RESISTANCE TO GROUND  CRUISE LIGHT WILL NOT COME ON IF THESE CONNECTIONS ARE NOT INSTALLED CORRECTLY.

6C YELLOW +12V ACTIVE WIRE AT SWITCH WHEN NSS/CLUTCH IS DEPRESSED.  CRUISE WILL NOT FUNCTION IF WRONG WIRE IS CONNECTED -OR- CRUISE WILL NOT DISSINGAGE WHEN CLUTCH IS DEPRESSED.

**Note:** All accelerator pedal voltages shown are with the pedal fully depressed with ignition power.

**HYUNDAI ACCENT/ELANTRA/ KIA RIO**

**TROUBLESHOOTING**

- All accelerator pedal voltages shown are with the pedal fully depressed with ignition power.
- Red: 2 volts Ignition
- White: 4 volts Ignition
- Green: 4 volts Ignition
- Yellow: 2 volts Ignition
- Red: 2 volts Ignition
