**Recommended Tools**

**Personal & Vehicle Protection**

Safety Glasses

**Special Tools**

Volt-Ohm Meter

**Installation Tools**

Trim Removal Tool  
Phillips Screwdriver  
10-mm Wrench  
Drill Bits 9.5MM or 3/8” (for switch)  
14mm Wrench  
Soldering Tool

**Special Chemicals**

**Conflicts**

**Note:**

**Legend**

![Legend Icon: Stop]  
**Stop:** Damage to vehicle may occur. Do Not Proceed until process compliance has been met.

![Legend Icon: Operator Safety]  
**Operator Safety:** Use Caution to Avoid Risk of Injury.

![Legend Icon: Critical Process]  
**Critical Process:** Proceed with Caution to Ensure a Quality Installation. These Points will be audited on a completed vehicle installation.

![Legend Icon: General Process]  
**General Process:** This highlights specific processes to ensure a quality installation. These points will be audited during the accessory installation.

![Legend Icon: Tools & Equipment]  
**Tools & Equipment:** This calls out the specific tools and equipment required for the process.

![Legend Icon: Revision Mark]  
**Revision Mark:** This mark highlights a change in installation with respect to previous issue.

**WARNING:** Do not use hand-held 2-way transceivers inside your vehicle while driving.

When transmitting from inside the car, 2-way radios that operate in the 25MHz-700MHz frequency range with more than 2.0 watts of power can produce electromagnetic interference that could interfere with the operation of cruise and throttle controls resulting in vehicle "LIMP MODE".

Use of cellular phones will not interfere with these controls.

Due to sensitive nature of signals used for this product, all non-plug and play connections must be soldered. Failure to comply with this requirement will void warranty.

Form #5381, Rev.A, 01-16-13
BEFORE INSTALLATION

To make the installation easier, the complete installation instructions should be read through before installation is started.

This installation instructions contains information how to install the Electronic Cruise Control which is not a Do-It-Yourself job.

Modern cars are equipped with electronics, which can be costly damaged by inappropriate treatment.

Rostra Precision Controls can not be held responsible for any error caused by wrong installation.

STOP-READ BEFORE INSTALLATION

IMPORTANT ADVISORY NOTES THAT YOU MUST FOLLOW

Always disconnect the negative cable from battery before installation.

Always use the enclosed installation instruction for installing the Electronic Cruise Control.

Check the part number of the cruise module label is the same compared to the part number of the installation instructions.

Be aware of radio codes that might have to be typed in.

Find a location to install the cruise module and control switch.

If any wires are left, then cut off and insulate.

Only use a multimeter to measure voltage.

Always drive the car for a complete test before assembling the car.

All wire leads must be soldered.
Connect to the accelerator pedal

Note: For vehicles with manual transmission only. Connect Clutch Harness to Control Module. Connect Yellow Wire to the top Clutch Switch connector to one of the 2 white wires.
Hyundai Accent: Connect the Red Ignition wire to pink wire in top left corner of white connect on the left side of the fuse box located under the drivers side dash.

Kia Rio: Connect the Red Ignition wire to orange wire (between gray and yellow wire) as shown at the traction control connector located behind the drivers side dash.
**Switch Harness**

**Rostra Switch**

* Both Blue/Yellow wires are spliced together. Just connect one BLU/YEL wire to the BLUE, and the other to the RED. The order does not matter.

---

**Do not drill hole for control switch before testing the cruise system**

**CONTROL SWITCH MOUNTING**

Use the lever wedges on the Control Switch at an angle template to drill a 3/8" or 9.5mm hole.

3/8" Hex Nut

Lockwashers

Lever Wedges

Shroud
