Note:

Legend

STOP: Damage to vehicle may occur. Do Not Proceed until process compliance has been met.

Operator Safety: Use Caution to Avoid Risk of Injury.

Critical Process: Proceed with Caution to Ensure a Quality Installation. These points will be audited on a completed vehicle installation.

General Process: This highlights specific processes to ensure a quality installation. These points will be audited during the accessory installation.

Tools & Equipment: This calls out the specific tools and equipment required for the process.

Revision Mark: This mark highlights a change in installation with respect to previous issue.

WARNING: DO NOT USE HAND-HELD 2-WAY TRANSCEIVERS INSIDE YOUR VEHICLE WHILE DRIVING.

When transmitting from inside the car, 2-way radios that operate in the 25MHz-700MHz frequency range with more than 2.0 watts of power can produce electromagnetic interference that could interfere with the operation of cruise and throttle controls resulting in vehicle “LIMP MODE”.

Use of cellular phones will not interfere with these controls.

Due to sensitive nature of signals used for this product, all non-plug and play connections must be soldered. Failure to comply with this requirement will void warranty.
BEFORE INSTALLATION

To make the installation easier, the complete installation instructions should be read through before installation is started.

This installation instructions contains information how to install the Electronic limiter Control which is not a Do-It-Yourself job.

Modern cars are equipped with electronics, which can be costly damaged by inappropriate treatment.

Rostra Precision Controls can not be held responsible for any error caused by wrong installation

STOP - READ BEFORE INSTALLATION

Important advisory notes that you must follow

Always disconnect the negative cable from battery before installation.

Always use the enclosed installation instruction for installing the Electronic limiter Control.

Check the part number of the limiter module label is the same compared to the part number of the installation instructions.

Be aware of radio codes that might have to be typed in.

Find a location to install the cruise module and control switch

If any wires are left, then cut off and insulate.

Only use a multimeter to measure voltage.

Always drive the car for a complete test before assembling the car.

All wire leads must be soldered.
Connect to the accelerator pedal

10mm Wrench
Battery Cable
Negative Battery

Connect data harness cap to OBD2 connector or Optional *Cut the Rostra connector off and solder wires: Red Wire to Pin 6, Black Wire to Pin 14

*Optional

To OBD2 Connector

To OBD2 Connector
Altima Under Drivers dash locate fuse box connect the Red Ignition power to position 16 Green wire located in the upper middle connector solder connection only.

NV200 Under steering column at ignition switch white 6 pin connector pin position 1 Blue wire connect and solder Red Ignition power.

Rogue Under steering column at ignition switch white 6 pin connector pin position 1 Pink wire connect and solder Red Ignition power.
Under drivers side dash connect Black wire ground to factory ground point shown in picture below.
