

# Technical Bulletin

**Date:** December 11, 2012

**Product Category:** RearSight® by Rostra

**Part Numbers:** 250-8083

Rostra Precision Controls, Inc. is pleased to announce an update to our **250-8083** bullet-style CMOS camera. The new version will ship with parking gridlines overlaid onto the video feed that can be disabled or enabled based upon your customer's preference. As well, we've consolidated the wiring harnesses to a 4-pin S-video cable for easier routing and connections.

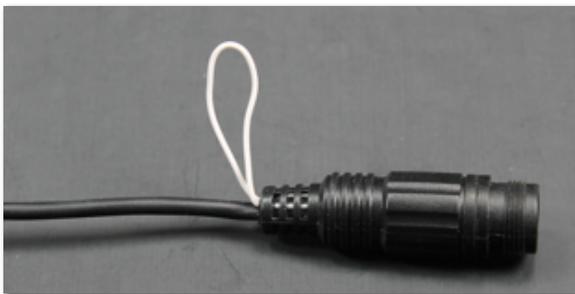

Please see the list below for a complete listing of Rostra's items that include this camera.

Parts Affected			
250-8081-BEXT	250-8081B	250-8083	250-8083A
250-8804-BULCAM	250-8085

### Parking Gridlines Note

This camera includes parking gridlines overlaid on the video feed by default to assist when parking in reverse. If the driver does not wish for gridlines to be included, simply locate the loop wire connected to the camera harness (**Figure 1**) and cut it in half (**Figure 2**).
