

TextBuster®

Applications and Account Manager Dashboard User Guide

Downloading the TextBuster® applications

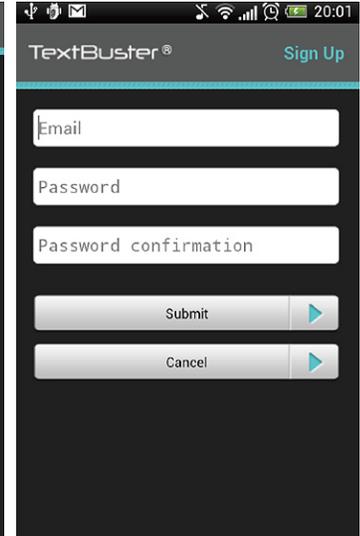

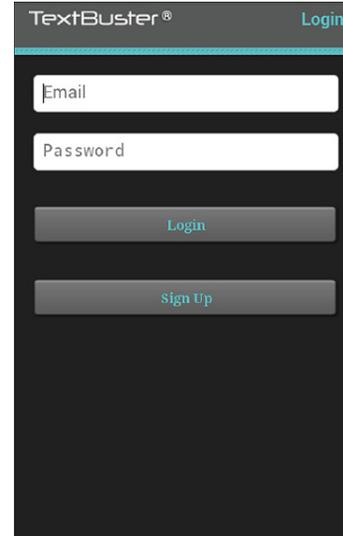

- After the TextBuster® device is installed into the vehicle there are two applications you will download onto the users phone from the Google play Android app store. (If your phone does not have the Google play icon simply open the internet browser and type Google play).
- Press the play store Icon on your Android phone then type TextBuster® at the top search bar on the Google play site. Download the **TextBuster® Watchdog application** first.
- Once the **Watchdog** application is downloaded hit the back button on your phone and download the main **TextBuster® application**.

Download and install

- If the TextBuster® or Watchdog applications are deleted from the users phone, an immediate SMS message is sent to the account manager(s).
- The account manager can personalize the phone users account credentials at the TextBuster® dashboard after the TextBuster® applications are downloaded and paired with the device in the vehicle.
- **Once both applications are downloaded the phone will need to be registered and paired with the vehicle that has the TextBuster® device installed.**
- **Note:** When pairing the device for the first time with the vehicle, the phone must have internet access.

Sign Up screen

- The first screen you will see after the TextBuster® main app is installed will be the **Login** and **Sign Up** screen.
- When installing TextBuster® for the first time click on **Sign Up**.
- The next screen to appear after you click **Sign Up** will be the registration screen.
- Choose an account manager email.
- The account manager is the parent, guardian or company fleet manager that will have access to set driving alerts, view trip logs from the users phone and receive SMS alerts if the TextBuster® application is tampered with.
- Next choose a password and confirm the password.
- Finally click on **Submit**.
- After you have clicked on **Submit**, a message will appear telling you sign up was successful.
- The main **login screen** will appear again.
- Enter the email address and password you submitted one more time.
- Then click on **Login**.

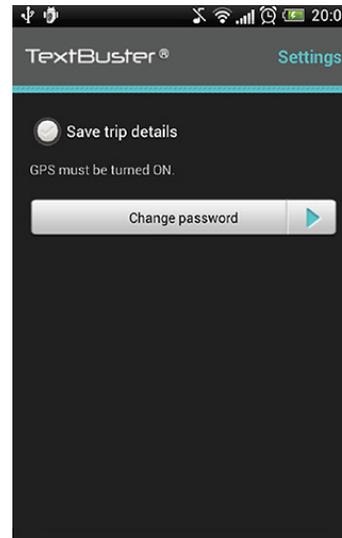

One time pairing the device

- If you have logged in successfully the main TextBuster® home screen will appear. The next step is to pair the phone with the device already installed into the vehicle.
- First start the vehicle or turn the vehicles ignition to the run position.
- Next click the **Pair with TextBuster®** button.
- After clicking on the **Pair with TextBuster®** button another request will appear with a Bluetooth address.
- Click on **Pair** again.
- If you do not receive a message to **Pair** like the screen on the right within 60 seconds, hit the back button on your phone and click on **Pair with TextBuster®** again.
- After clicking on the **Pair** button the app will return to the TextBuster® home screen.
- A message will appear stating: **Paired successfully with TB device.**

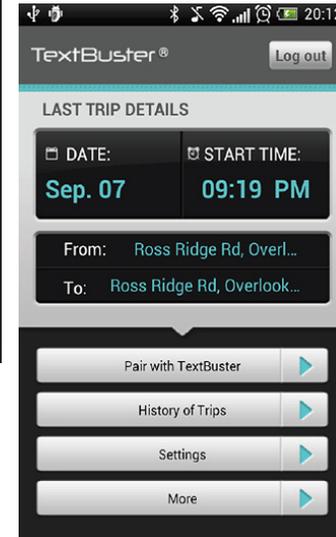

Settings must be checked to monitor trip details

- Once the TextBuster® phone has been paired with the device in the vehicle click on **Settings**.
- If you are using the **optional** tracking and alert monitoring features that come with TextBuster®, check the **Save trip details** circle.
- The default setting is off.
- When done click the back button on the phone to return to the **Last Trip Details** screen.

Log out of the TextBuster® app

- Finally click **Log Out**.
- You must **Log Out** after pairing the device and clicking on the Settings button.

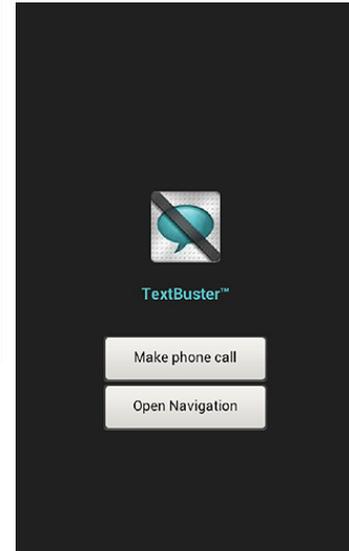

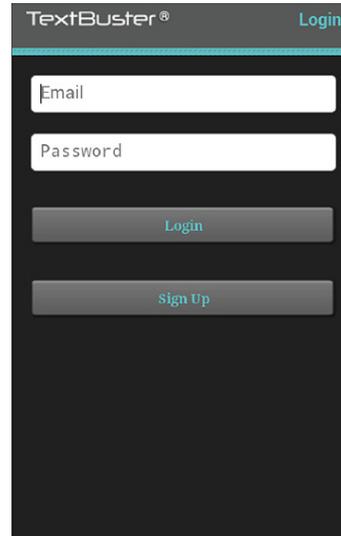

Hit the back button

- After you click **Log Out** it will take you back to the Login Screen.
- Hit the phones **back button** and if the vehicle is still running the TextBuster® locking screen will appear. If the vehicle is not running the phones normal home screen will return.

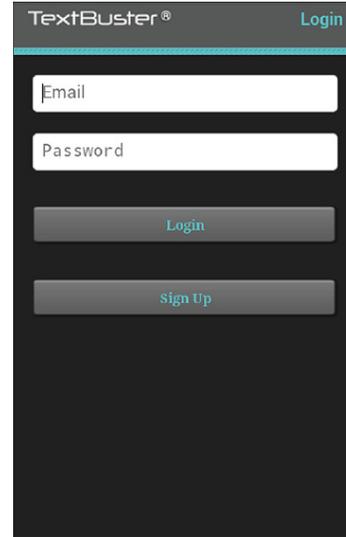

Locked TextBuster® screen

- This is the screen the user will see every time they enter and start the vehicle.
- The TextBuster® screen will allow the user to make a call or use the phone's navigation screen only.
- When the vehicle is turned off the screen will return to the phone's normal home page status 30 to 45 seconds later.

View trips from the phone

- If you monitoring the trip details for the phone user this can be done through the TextBuster® phone app or by logging onto **www.textbuster.com**.
- If using the phone app click on the **TextBuster® Icon** under the phones applications.
- **Note:** You can not login to the phone, if the vehicle the phone is paired with is running.
- After clicking on the TextBuster® Icon, click on **Login** and enter the account manager email and password credentials.

The image shows a mobile application interface for TextBuster. At the top left is the TextBuster logo, and at the top right is a 'Login' link. Below the header are two input fields: 'Email' and 'Password'. Underneath these fields are two buttons: 'Login' and 'sign Up'.

Last Trip Details

- Once logged in the Last Trip Details will display on the screen. Click on **History of Trips** to view more details of each trip taken.

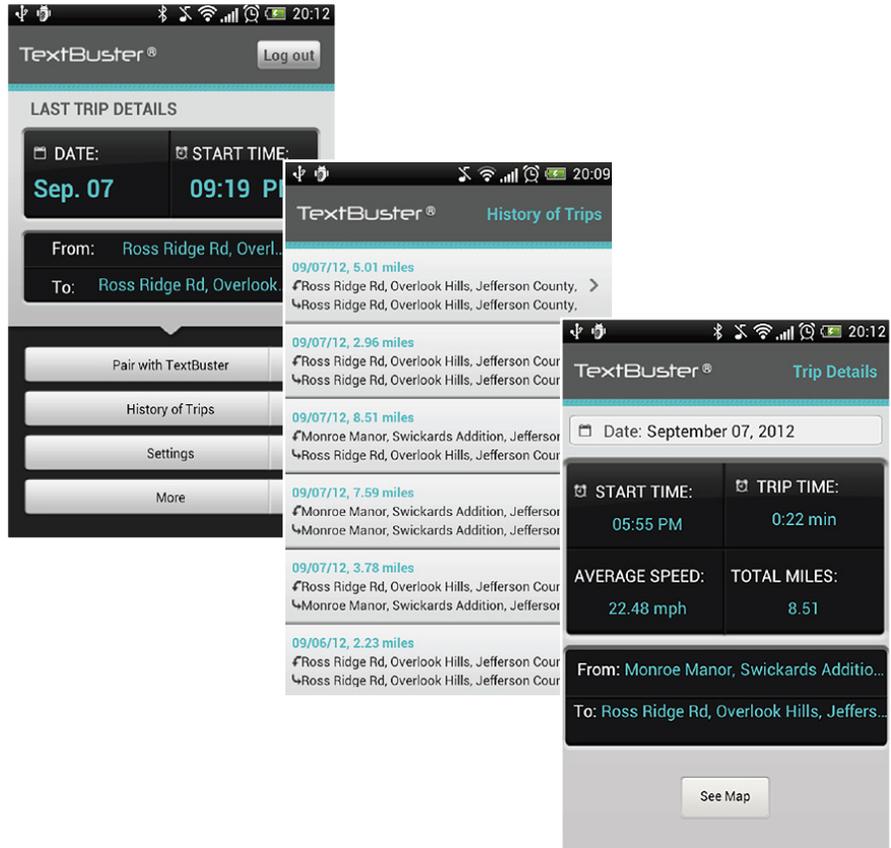

History of Trips

- After clicking on **History of Trips** choose the route you would like to view more details.
- Routes can be deleted on the TextBuster® server after viewed. Routes are automatically deleted after 5 days.

Selected Trip Details

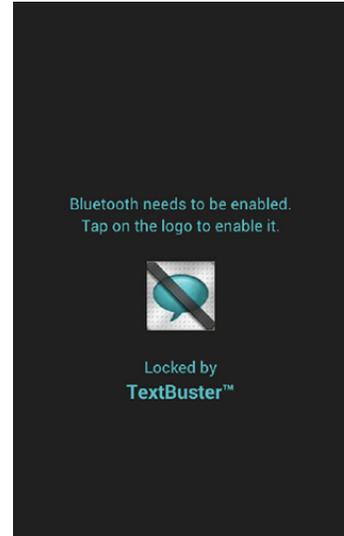

- The next page will provide details of the trip taken.
- Click on **See Map** if you would like to see the route taken.
- When done viewing trips hit the back button on the phone until you get to the **Last Trip Details** screen.

Log Out when finished

Bluetooth

- The TextBuster® device communicates via Bluetooth to the users phone.
- If the Bluetooth is turned off on the phone a screen will appear requesting to tap the icon in the center.
- **Tap the Icon** and phone screen will return to the last screen displayed.

TextBuster® Dashboard

- You can also monitor the phone users trips, set alerts and receive SMS messages if the TextBuster® application has been tampered with.
- Go to www.textbuster.com

TextBuster®

About Tech Support Contact TextBuster Installation Company History **Login**

No Texting & Driving

Texting behind the wheel is now officially the most dangerous distraction according to the AAA. TextBuster® was designed to prevent vehicle accidents while also safeguarding your loved ones, employees and everyone that operates a motorized vehicle!

Available on the Android Market

"You cannot legislate common sense. A statewide texting ban would probably not be enforceable."

- Tom Niehaus, Senate president

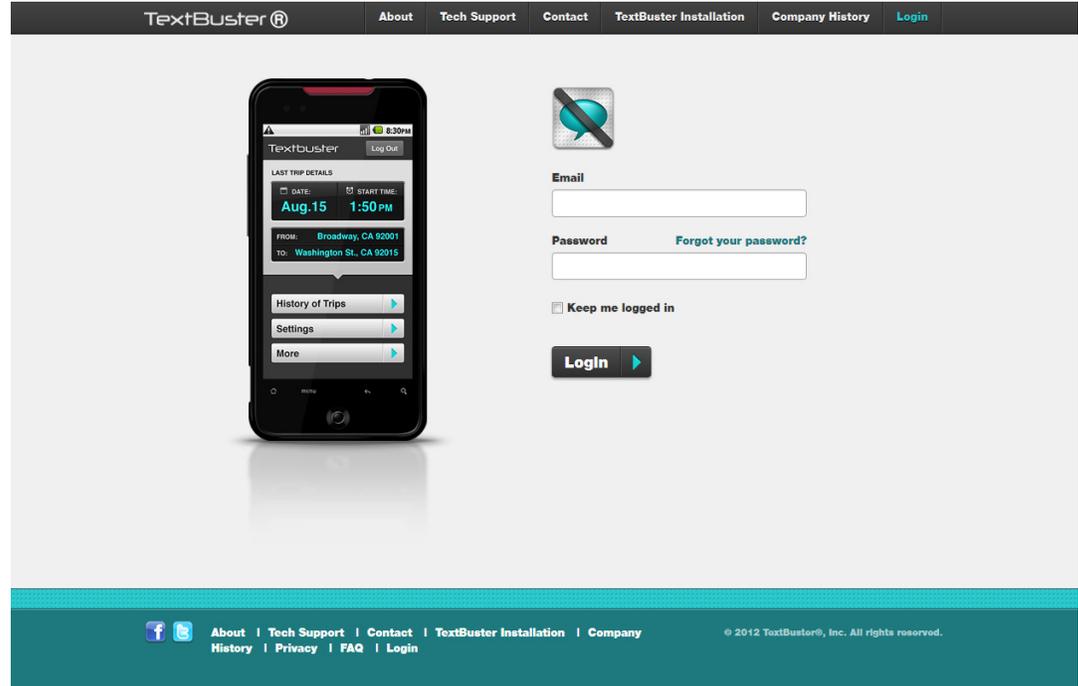

"...If troopers do determine that a driver had been texting prior to an accident, that person would face a more serious violation."

- Lt. Eric Escola, of the Ohio St. Highway Patrol

"The NTSB recommends devices deemed to aid driver safety. TextBuster® provides that - blocking phone data & monitoring driving"

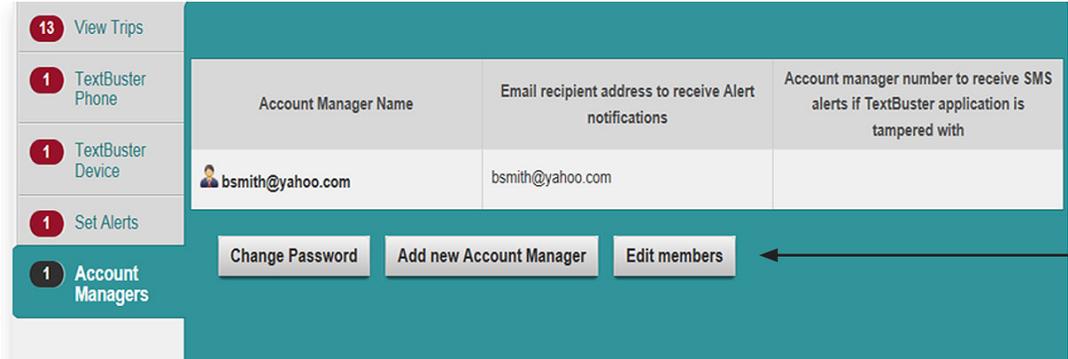

- NTSB Chairman, Deborah Hersman

- Enter the account manager email and password.

Account Managers

- The account manager dashboard will appear after you login. When the phone is first paired in the vehicle the credentials will automatically upload to the TextBuster® server.
- Click on **Edit Members**.
- Enter an account managers cell phone number to receive SMS alerts if the TextBuster® application is tampered with. The phone number should be in an international format 10 digits long with no dashes.
- You can edit the account managers name from the email default. Be sure to click **Save changes** when done.

Set Alerts

- Setting Alerts. Click on **Set Alerts** then click **Add new Alert**.
- There are three different types of alerts. Click the drop down menu to choose the alert type. The default alert is set to **Leaving area**.

The screenshot shows a sidebar menu on the left with the following items: 'View Trips' (13), 'TextBuster Phone' (1), 'TextBuster Device' (1), 'Set Alerts' (0), and 'Account Managers' (1). The main content area has a teal header and a table with columns: Name, Event type, Conditions, Phones, and Contacts. Below the table are two buttons: 'Add new Alert' and 'Remove Alert'.

The screenshot shows the 'Set Alerts' form. The sidebar menu is the same as in the previous screenshot. The form has two main sections: 'Put a name to the Alert' with a text input field, and 'Type of Alert' with a dropdown menu showing 'Leaving area'. There is also a scrollable area at the bottom of the form.

- Setting Leaving the area alert. Scroll down to the bottom of the page and click **Add new point**.
- Find your geographic location on the map and zoom in with the mouse. You will need to drag the pin with you when moving the map. Then pull the circle to adjust the perimeter settings.
- You must check the box of the phone user for the alert setting and the account manager to receive the email alert. Also put a name to the alert at the top of the page. Click **Create Alert** at the bottom of the page when done.

View Trips

- View trip details. The drop down columns next to the view trips tab allow you to select the specific phone user or particular TextBuster® vehicle if there are multiple users or vehicles under the same account manager. Click on the highlighted trip under the **Trip Details** column to view more details and routes traveled.
- A caution symbol next to the trip indicates an **alert** is set for the phone user. If there are no alerts set a green circle will replace the caution symbol.
